Why use Shinil's Ceramic Heater?

Ceramic has a High durability due to its strong Thermal resistance.
The far-infraRed radiation from the Heater brings a Higher body Temperature by penetrating deeply in to the body.
You will feel a lot more Warm with over 95% of far-infrared radiation.

The Best Choice for Winter
Shinil Halogen Heater

It's better than the general Ceramic Heaters in terms of Power Consumption and heat efficiency,
As soon as it's Switched on, it heats up so fast, you feel Warm in no Time.
There are no concerns over noise or odor, and can be freely used in places with no ventilation during winter season.

Shinil Wick Heater,

You don't have to worry about being cold during Camping with Shinil wick Type Heater.

It requires Minimum space for installation due to its compact size; it is ideal for Small heating Areas or when season changes.
The heat is deliveRed throughout four surfaces without blind spots which allow an even heat transfer.
